

Reclaimed and Specialty Products

The Building Center stocks multiple species of reclaimed wood sourced from a variety of locations in the Southeast. Oak, Cherry, Wormy Chestnut, Walnut, Pine and others are available in multiple widths as boards, timbers or beams. The millwork shop can create a satin smooth finish or a barely touched rough hewn accent wall, and straight or live edge shelving.

TBC carries cedar and spruce material to provide an exterior WOW factor, and can design custom shutters in a variety of styles to accent your window and door selections.

The extensive focus on specialty materials allows TBC customers to make their homes really stand out from others on the market.

Our mission is to be your most valued building partner, building the homes we live in today.
